▶ MY ACTIVITIES FOR THE Think Tank Trinità dei Monti

I took part in the activities of the Think Tank Trinità dei Monti as a "Young-Thinktanker" in May 2020. I am currently part of the editorial team, for which I write articles on a monthly basis. In particular, I write about the space sector and its implications on the international system. Furthermore, I am working on a project concerning Smart Working and its consequences on society.

STUDIES

I am a recent graduate in International Relations from the University of Bologna. In 2019, I was selected to take part in a three-month Leadership Program offered by Confindustria. During the master I focused on space policy taking advantage of the Erasmus Scholarship to study it at Charles University in Prague. In 2017, I obtained a bachelor's degree in Political Science at the University of Trieste. Also, I have attended two Summer Schools in the past. The first one in Energy Security at Vilnius University in 2017. The second, in 2020, offered by the University of Genoa in Space Law and Technology. Finally, in 2020, I took a three-month specialization in Future Studies from the Institute for the Future.

▶ WORK EXPERIENCE

In 2020 I worked as Project Manager for an Italian SME which works in the e-learning sector. As PM, I was in charge of improving its internal processes. In 2019, I worked as Business Development intern for SmartGuide for which I was in charge of the market analysis for the Italian market.

OTHER ACTIVITIES

I am currently an Author for Astrospace.it, for which I write on space policy issues and I do interviews. From January 2020, I have been volunteering for NOW! the Global Movement. Likewise, from March 2020, I have been volunteering for the SGAC Ethics and Human Rights Group. In 2017, I co-organized the Youth Speak Forum on the SDG 16 thanks to AIESEC, for which I volunteered from 2015 to 2017 holding local and national positions.
